The Northpointe Suite is an automated decision-support software package of industry leading risk, needs assessment and case management tools. The instruments address the complex set of risk, need and case management considerations that improve decision accuracy in custody, supervision and programming based on underlying criminogenic needs.

The Northpointe Suite is an integrated web-based assessment and case management system for criminal justice practitioners who must make decisions regarding community placement, supervision, treatment and case-management of offenders. The Northpointe solution is used in pretrial, probation, institutions, parole and community corrections across the country.

Northpointe Suite Modules

COMPAS Core
COMPAS Core Risk/Needs and Case Planning is designed for both male and female offenders recently removed from the community or currently in the community e.g. jail, probation, community corrections, etc. COMPAS Core takes a “retrospective” look at risk and needs factors for placing and supervising the offender in the community.

COMPAS Reentry
COMPAS Reentry Risk/Needs and Case Planning provides a state-of-the-art risk and needs assessment tool for the Reentry population who has been incarcerated for more than 18 months. COMPAS Reentry takes a “prospective” look at both the male and female populations in assessing the risks and needs of offenders preparing to leave incarceration and transition back into the community.

Risk/Needs and Case Planning is designed for both adult and youth offenders recently removed from the community or currently in the community.

The Northpointe Suite offers the LSI-R, LSI-R:SV and LSI-CMI assessment tools for those agencies that utilize the Multi-Health assessments in their daily practice. These assessment instruments are integrated with the Suite Case Plan for seamless development of case-specific plans, ongoing supervision case management and ad-hoc report creation.
The most scientifically advanced risk and needs assessments

Take a “retrospective” look at risk and needs factors over the previous 12 months for making treatment and supervision decisions at intake and in the community or a “prospective” look at risk and needs for longer term incarcerated inmates transitioning back into the community.

- Criminogenic needs scales
- Support development and execution of treatment decisions
- Review historical assessment results and prior case plan activity and outcomes

About equivant

We are driven by a justice system that instills confidence through its processes and is accessible to all citizens. Like you, equivant aims to embrace community while advancing justice and delivering better outcomes to all who touch the justice system. We do this through our deep domain knowledge, modern technologies, and expert services that help promote public and individual safety by informing decisions at every step. As fellow stewards of justice, equivant is committed to your mission and we value your ideals. Our people operate with fairness and integrity, believing that there is no such thing as “good enough”.
